To Quoc Bao

Senior Software Engineer

baotoq@outlook.com | 0708 270 306 | GitHub | LinkedIn

Senior backend engineer with 7+ years building distributed systems — .NET, Go, and Kubernetes-native architectures across insurance, e-commerce, and enterprise platforms. Designed high-throughput event pipelines, owned systems end-to-end from implementation to production, and champions AI-assisted development (Claude Code, agent workflows) to accelerate team delivery.

Work Experience

covergo

Senior Software Engineer

Feb 2025 – Present
Current 1 yrs 3 mos

*CoverGo is a leading provider of **insurance solutions**, offering a comprehensive suite of products and services to businesses and individuals.*

- Built ***quotation engine*** for **multi-tenant** insurance administration, serving (N) tenants.
- Designed ***GraphQL*** APIs and ***Vue.js*** frontends delivering **quote-to-bind** workflows for underwriters.
- Adopted ***Dapr*** for service-to-service communication across (N) cloud-native services, standardizing pub/sub and state management.
- Operated containerized workloads on ***Kubernetes*** with ***FluxCD*** GitOps on ***AWS***, owning deploys end-to-end.

Upmesh

Senior Software Engineer

Oct 2021 – Jan 2025
3 yrs 4 mos

***Upmesh** is a pre-Series A SaaS startup (raised $10M in 2021) that enables seamless purchases through livestreams (Facebook & Instagram), transforming **e-commerce** into an interactive, real-time experience.*

- Built a high-throughput ***Facebook*** capture system handling **10k comments/sec** at peak, integrating **Stripe** and **3rd-party logistics** for near real-time order processing and fulfillment.
- Implemented **full-text search** with ***Elasticsearch*** for **10M+ records**, reducing latency and improving query speed under load.
- Owned **end-to-end delivery** across the full lifecycle, from architecture design and development to deployment, monitoring, and production operations
- Operated ***GitOps*** workflows (***FluxCD, Kubernetes, GitHub Actions***), reducing deployment time by **75%** and accelerating time-to-market.
- Architected **integration tests** using ***Testcontainers***, reducing environment setup time by **50%** and eliminating flaky tests.

ASWHITE

Software Engineer

Jan 2021 – Sep 2021
9 mos

*Contributed to systems at **Premex Group**, a leading UK medico-legal services provider specializing in **insurance claims**, **medical reporting**, and **rehabilitation case management**.*

- Collaborated with UK stakeholders to translate **insurance claim workflows** into clear technical requirements.
- Built a ***React.js*** portal and ***ASP.NET Core*** **RESTful APIs**, streamlining claim processing and data flow.
- Optimized **database queries** and **indexing strategies**, reducing API response times by **~35%** for claim-related operations.
- Set up **CI/CD pipelines** on ***Azure DevOps***, enabling automated testing and faster delivery.

Nash Tech.

Dec 2018 – Dec 2020

2 yrs 1 mos

Software Engineer

*Contributed to the development of a cutting-edge portal at **Lowell**, a leading European credit management company, streamlining **document management** and improving internal **interactions with courts**.*

- Built a **data standardization adapter** to **transform** and **bridge** data between legacy systems and new internal platforms, enabling seamless integration.
- Developed a ***Vue.js*** feature-rich portal backed by ***ASP.NET Core*** **RESTful APIs** and **gRPC** services supporting core backend workflows.
- Implemented **real-time push notifications** using ***Azure SignalR*** for instant user updates.
- Integrated with ***Opentelemetry*** for observability, enabling faster incident detection.
- Conducted comprehensive unit tests and integration tests, maintaining a minimum **code coverage of 90%**.

Education

Bachelor of Computer Science

Ton Duc Thang University

2014 – 2018
