To Quoc Bao

Senior Software Engineer

ci@example.com | +10000000000 | GitHub | LinkedIn

Senior backend engineer with 7+ years building distributed systems — .NET, Go, and Kubernetes-native architectures across insurance, e-commerce, and enterprise platforms. Designed high-throughput event pipelines, owned systems end-to-end from implementation to production, and champions AI-assisted development (Claude Code, agent workflows) to accelerate team delivery.

Work Experience

covergo

Feb 2025 – Present

Current 1 yrs 3 mos

Senior Software Engineer

- Built ***quotation engine*** for **multi-tenant** insurance administration, serving ⟨N⟩ tenants.
- Designed ***GraphQL*** APIs and ***Vue.js*** frontends delivering **quote-to-bind** workflows for underwriters.
- Adopted ***Dapr*** for service-to-service communication across ⟨N⟩ cloud-native services, standardizing pub/sub and state management.
- Operated containerized workloads on ***Kubernetes*** with ***FluxCD*** GitOps on ***AWS***, owning deploys end-to-end.

.NET Core, dapr, Vue.js, redis, mongoDB, docker, GitHub, FluxCD, aws

Upmesh

Oct 2021 – Jan 2025
3 yrs 4 mos

Senior Software Engineer

- Built automated ***Facebook*** comment capture handling **5,000 comments/sec** at peak, enabling **near real-time order processing** during live streams.
- Designed scalable APIs integrating ***Stripe*** and ***3rd-party logistics***, owning **end-to-end** delivery from implementation to production.
- Implemented ***Elasticsearch*** full-text search over **millions of records**, significantly improving query latency.
- Operated ***GitOps*** workflows, ***Kubernetes*** clusters, and ***CI/CD pipelines*** on ***AWS*** — **reduced deploy time 75%**.
- Pioneered ***Testcontainers*** for unit + integration tests, **cutting setup time** and improving reliability.
- Led ***Terraform***-based infrastructure provisioning and ***ELK*** observability across services.

ASWHITE

Jan 2021 – Sep 2021
9 mos

Software Engineer

- Collaborated with Product Owner and UK stakeholders to refine requirements, aligning delivery with user needs.
- Built responsive ***React.js*** portal backed by ***RESTful APIs***, optimizing data flow between frontend and backend.
- Performed frontend + backend unit tests and **led code reviews** to maintain coding standards.
- Established ***CI/CD pipelines*** on ***Azure DevOps***, enabling automated testing and deployment.

Nash Tech.

Dec 2018 – Dec 2020
2 yrs 1 mos

Software Engineer

- Built data standardization adapter converting legacy external system data, enabling **smooth integration** with internal systems.
- Implemented feature-rich portal with ***RESTful APIs*** and ***gRPC*** services backing core backend workflows.
- Implemented real-time push notifications via ***Azure SignalR*** for **instant user updates**.
- Integrated ***Grafana***, ***Prometheus***, ***Alert Manager***, and ***Jaeger*** for metrics and tracing; maintained **80% code coverage** via unit + integration tests.
