# To Quoc Bao

**Senior Software Engineer**

baotoq@outlook.com | 0708 270 306 | GitHub | LinkedIn

Senior backend engineer with 7+ years building distributed systems — .NET, Go, and Kubernetes-native architectures across insurance, e-commerce, and enterprise platforms. Designed high-throughput event pipelines, owned systems end-to-end from implementation to production, and champions AI-assisted development (Claude Code, agent workflows) to accelerate team delivery.

## Work Experience

### covergo

Feb 2025 – Present
Current 1 yrs 3 mos

**Senior Software Engineer**

- Built *quotation engine* for **multi-tenant** insurance administration, serving ⟨N⟩ tenants.
- Designed *GraphQL* APIs and *Vue.js* frontends delivering **quote-to-bind** workflows for underwriters.
- Adopted *Dapr* for service-to-service communication across ⟨N⟩ cloud-native services, standardizing pub/sub and state management.
- Operated containerized workloads on *Kubernetes* with *FluxCD* GitOps on *AWS*, owning deploys end-to-end.

### Upmesh

Oct 2021 – Jan 2025
3 yrs 4 mos

**Senior Software Engineer**

- Built automated *Facebook* comment capture handling **5,000 comments/sec** at peak, enabling **near real-time order processing** during live streams.
- Designed scalable APIs integrating *Stripe* and *3rd-party logistics*, owning **end-to-end** delivery from implementation to production.
- Implemented *Elasticsearch* full-text search over **millions of records**, significantly improving query latency.
- Operated *GitOps* workflows, *Kubernetes* clusters, and *CI/CD pipelines* on *AWS* — **reduced deploy time 75%**.
- Pioneered *Testcontainers* for unit + integration tests, **cutting setup time** and improving reliability.
- Led *Terraform*-based infrastructure provisioning and *ELK* observability across services.

### ASWHITE

Jan 2021 – Sep 2021
9 mos

**Software Engineer**

- Collaborated with Product Owner and UK stakeholders to refine requirements, aligning delivery with user needs.
- Built responsive *React.js* portal backed by *RESTful APIs*, optimizing data flow between frontend and backend.
- Performed frontend + backend unit tests and **led code reviews** to maintain coding standards.
- Established *CI/CD pipelines* on *Azure DevOps*, enabling automated testing and deployment.

Nash Tech.

Dec 2018 – Dec 2020

2 yrs 1 mos

### Software Engineer

- Built data standardization adapter converting legacy external system data, enabling **smooth integration** with internal systems.
- Implemented feature-rich portal with ***RESTful APIs*** and ***gRPC*** services backing core backend workflows.
- Implemented real-time push notifications via ***Azure SignalR*** for **instant user updates**.
- Integrated ***Grafana***, ***Prometheus***, ***Alert Manager***, and ***Jaeger*** for metrics and tracing; maintained **80% code coverage** via unit + integration tests.

## Education

### Bachelor of Computer Science

Ton Duc Thang University

2014 – 2018
